Net Weight 50 lb (22.67 kg)
DIRECTIONS
Feed this ration at a rate to provide 22.7 mg. decoquinate per 100 pounds of body weight (0.5 mg/kg) daily to cattle - as indicated in the table below.

<table>
<thead>
<tr>
<th>Animal Weight</th>
<th>Feeding Rate Per Head/Day</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 lbs.</td>
<td>1.0 lbs.</td>
</tr>
</tbody>
</table>

Feed for at least 28 days during periods of coccidiosis or when experience indicates that coccidiosis is likely to be a hazard. Coccidiostats are not indicated for use in adult animals due to continuous previous exposure.

Follow these management practices:
1. Provide a source of fresh clean water at all times.
2. To insure freshness, offer only the amount of feed recommended.
3. Clean feeder pails daily.
4. Proper housing and sanitation are important to help prevent calf diarrhea and pneumonia. Consult your veterinarian for a planned herd health program.
5. When calves are housed in groups after weaning, provide adequate feeding space.

IMPORTANT
This product is to be fed only to the animal species as directed on this label.

CAUTION
Store in dry, well ventilated area protected from rodent and insect. Do not feed moist or insect-infested feed to animals as it may cause illness or death.

WARNING
DO NOT feed to cows producing milk for food.

This product was made in a feed manufacturing facility that does not handle or store products containing proteins prohibited in ruminant feed.

INGREDIENTS:
- Grain Products, Plant Protein Products, Processed Grain By-products, Sun-cured Alfalfa Meal, Roughage Products, Molasses Products,
- Vitamin A Supplement, Vitamin D Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Biotin, Choline Chloride,
- Copper Sulfate, Zinc Sulfate, Manganese Sulfate, Calcium Carbonate, Salt, Ferrous Sulfate, Manganese Sulfate, Zinc Sulfate, Copper Sulfate, Choline Chloride,
- Calcium Phosphate, Calcium Carbonate, Salt, Ferrous Sulfate, Yucca Schidigera Extract, Sodium Selenite, Copper Sulphate, Lactobacillus acidophilus Fermentation Product Dehydrated, Lactobacillus casei Fermentation Product Dehydrated, Bifidobacterium thermophilum Fermentation Product, Enterococcus faecium Fermentation Product Dehydrated, Manganese Oxide, Magnesium Oxide, Zinc Oxide, Ethylenediamine Dihydrochloride, Cobalt Carbonate, Potassium Chloride, Manganese Sulfate, Sodium Nitrate, Copper Sulphate, Zinc Sulfate, Copper Chloride, Zinc Sulfate, Calcium Iodate.

FEEDING DIRECTIONS:
- Does Not Kennedy: Feed 2 to 3 oz per doe the first day. Increase gradually by 1 oz per doe day to free-choice feeding within 4 to 5 days.
- Doe/Gravid Does: Feed 4 to 6 oz per doe per day.
- Doe/Breeder: Feed 4 to 6 oz per head per day.
- Does may be supplemented with feeders of all times at approximately the same time. Monitor body condition and adjust feeding levels to maintain desired body condition. It is not necessary to feed hay with NatureWise Rabbit Pellets 16. High-quality hay may be fed if desired. Hay must be stemless, leafy, green in color, well-cured and free from mold or mold. Alfalfa, clover, sweet clover, timothy, red clover, and peanut hay are suitable. Cutting the hay into 3-4 inch lengths will help avoid waste. Provide a product contains Yucca Schidigera Extract as an aid in the control of manure odor.

INGREDIENTS
Dehulled Soybean Meal, Steam Flaked Corn, Ground Corn, Steam Flaked Barley, Rolled Oats, Molasses, Distillers Dried Grain, Soybean Hulls, Calcium Carbonate, Ammonium Chloride, Salt, Monocalcium Phosphate, Dicalcium Phosphate, Calcium Sulfate, Sodium Bicarbonate, Magnesium Sulfate, Magnesium Oxide, Potassium Sulfate, Mineral Oil, Ferrous Sulfate, Manganese Sulfate, Zinc Sulfate, Vitamin A Acetate, dl-alpha-Tocopheryl (source of Vitamin E), Cobalt Carbonate, Ethylenediamine Dihydriodide (EDDI), Calcium Iodate, D-Activated Animal Sterol (source of Vitamin D3), Vegetable Oil, Sodium Selenite, Artificial Flavoring.

INSTRUCTIONS FOR FEEDING
Feed 1.00 to 4.66 pounds of Lamb Flex per head per day to provide 15 mg to 70 mg of Lasalocid. Always monitor consumption closely and provide fresh clean water at all times. Use only as directed. Excessive consumption may result in adverse toxic reaction. Contact your Cache Commodities feed representative for more complete directions on optimizing the growth of your lamb.

CAUTION
The safety of Lasalocid in unapproved species has not been established. Do not allow horses or other equines access to feeds containing Lasalocid, as ingestion may be fatal.

INGREDIENTS
Steam Flaked Corn, Beet Pulp Shreds, Steam Flaked Oats, Dehulled Soybean Meal.
Mechanical Extracted Soybean Meal, Humin, Soybean Hulls, Molasses Products, Cottonseed.
Wheat Middlings, Cottonseed Hulls, Condensed Corn Fermentation Solubles, Vegetable Fat,
Yeast culture, Sodium Bicarbonate, Magnesium Limestone, Calcium Carbonate, Salt, Artificial
Flavoring, Monocalcium Phosphate, Dicalcium Phosphate, Magnesium Oxide, Mineral Oil,
Vitamin A, Acetate, Iron Sulfate, Magnesium Sulfate, Thiamine Mononitrate, Zinc Sulfate,
D-Activated Animal Sterol (source of vitamin D3), Zinc Protomate, Copper Sulfate, Calcium
Salts of Free Fatty Acids, Plant Charcoal, Sodium Alumino Silicate, dl-alpha-Tocopherol
(source of vitamin E), Sodium Selenite, Biotin, Kept, Calcium Iodate, Cobalt Sulfate.

INSTRUCTIONS FOR FEEDING

Each pound of feed contains 15 mg of Monensin. Do not exceed 32 lbs per head per day. Limitation
Feed only to cattle being fed in confinement for slaughter. Feed continuously in complete feed
at a rate of 50 - 150 mg of Monensin per head per day. No additional improvement in feed
conversion has been shown from feeding Monensin at levels greater than 30 g/ton (150 mg per
head per day). To achieve 50 mg Monensin feed at least 3.34 lbs of this feed.

CAUTION

Do not allow horses or other equines to access to feed containing Monensin. Digestion of Monensin
by horses has been fatal. Monensin medicated cattle and goat feed is safe for use in cattle and
goats only. Consumption by unapproved species may result in toxic reaction. Do not exceed the
level recommended in the feeding directions, as reduced average daily gains may result. If feed
remains containing Monensin are fed to other groups of cattle the concentration of Monensin in
the feed and the amount of feed fed should be taken into consideration to prevent
Monensin overdosing.

WARNING

A withdrawal period has not been established for this product in per-numbering calves. Do
not use in calves to be processed for veal.

- Feeding recommendations are based on average daily requirements for horses of different body weights. Actual feeding rates required to adequately maintain good condition of individual horses will be affected by individual metabolism and progression rate of aging processes. Therefore, feeding rates may need to be gradually adjusted in some horses according to body condition.

Feeding Equine Senior Horse Feed with forage—Good quality hay pasture may be fed along with Equine Senior Horse Feed. Make sure your horse is free of dental problems and can effectively chew and utilize forage. Reduce the amount of Equine Senior Horse Feed by 1.0 lb for every 1.5 - 2.0 lbs of hay consumed by your horse.

Do not feed less than 6.0 lbs of Equine Senior Horse Feed per day when using hay to meet minimum daily requirements of protein, vitamins, and minerals.

IMPORTANT

1. Any feed changes should be made gradually over a period of 7 to 10 days. Changes in the rate of feeding should not exceed 1 pound per day for each horse. Feed at regular times—three daily feedings preferred. Be sure to weigh your feed using a scale. A small scale can be purchased in the fishing department of many sporting goods stores.
2. Reduce and/or delay feeding a horse which is hot, excitable, showing pain, has fever or diarrhea. Consult your veterinarian if problems arise. Prevent rapid eating.
3. Let horses feed in a natural position from large feed containers.
4. Have plenty of fresh, clean water available at all times.
5. Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals—may cause illness or death.
7. Be sure that your horses are free of dental problems.
8. Feeding selenium resulting in total diet levels exceeding 0.3 ppm prohibited.

INSTRUCTIONS FOR FEEDING
Each pound of Dairy Health Calf Starter contains 24 mg of Lasalocid. Hand feed enough to provide 1 mg per 2 pounds of body weight (i.e. provide 4.2 lbs to a 200-pound animal). Maximum rate is 350 mg per day.

CAUTION
The safety of Lasalocid in unapproved species has not been established. Do not allow horses or other equines, dogs or cats, access to Lasalocid, as ingestion may be fatal.
